
Introducing Porky. A conversion kit that really brings home the bacon.

Magic Electronics has just created a way to breathe new life into your tired old Pacman. It's Porky. An action-packed adventure game that combines the thrill of a driving game with the skill of a shooting game. (Smoking sausages!) Players help Porky shoot piglets from the sky, while evading the big bad wolf at the same time.

Let Magic cast a spell on your tired, old games.

Like all conversion kits from Magic Electronics, Porky is inexpensive, easy to install and comes complete with everything you need. So give your customers a chance to ham it up while you bring home the bacon. Order Porky today.
